Industrial Lithium-Ion Battery Developer Flux Power Named to Food Logistics' Top Green Providers List for 2017

VISTA, Calif., June 29, 2017 (GLOBE NEWSWIRE) -- Flux Power Holdings, Inc. (OTCQB:FLUX), a developer of advanced lithium batteries for industrial applications including electric forklifts and airport ground support equipment, announced today that *Food Logistics*, the only publication exclusively dedicated to global food supply chain, has named Flux Power to the **Top Green Providers** list for 2017. Flux also acknowledged its early-adopter customers for their initial deployments of Flux's LiFT Pack forklift batteries.

"The future viability of the world's food supply chain is dependent upon our ability to integrate sustainability from farm to fork," says Lara L. Sowinski, editorial director. "Transportation and logistics comprise a significant part of that supply chain, and we commend those companies in our industry that embrace their role as environmental stewards, while raising the sustainability bar for their peers."

Beyond improved efficiency, performance and a substantially longer useful life, Flux's lithium-ion battery solutions offer a substantial environmental improvement over legacy lead-acid batteries. The food and beverage industries have been quick to recognize these benefits, and Flux congratulates its customers and partners for their support and initial deployment of clean lithium-ion battery power.

"We are very grateful for this acknowledgement by Food Logistics, as we've been very impressed with the vision and openness of the food industry to our new forklift power solutions," said Flux CEO Ron Dutt. "Our LiFT Pack's low environmental footprint, efficiency and reliability, combined with a lower total cost of ownership was quick to resonate with this audience, generating some of our earliest customers and pilots. Flux salutes our customers for their intelligent combination of business acumen and actions in support of environmental responsibility."

Food Logistics' annual **Top Green Providers** recognizes companies whose products, services, or exemplary leadership is enhancing sustainability within the food and beverage industry. Each year, the criteria for earning a spot on the list become more stringent for applicants. For example, the editorial staff evaluates a company's facilities that feature energy saving installations and retrofits that produce measure reductions in GHG emissions.

About Flux Power Holdings, Inc. (www.fluxpwr.com)

Flux Power develops advanced lithium-ion batteries for industrial uses, including the first-ever UL 2271 Listed lithium-ion "LiFT Pack" forklift batteries. Flux solutions utilize its proprietary battery management system (BMS) and in-house engineering and product design. Flux batteries deliver improved performance and safety, extended cycle life and

lower total cost of ownership than legacy lead-acid solutions. Flux sells primarily to lift equipment OEM's, their dealers and battery distributors. Current products include advanced battery packs for motive power in the lift equipment and airport ground support markets.
